Health Physics Pergamon Press 1976. Vol. 31 (December), pp. 587–592. Printed in Northern Ireland

VOLUME 31 CONTENTS

NUMBER 1 JULY

D. W. MOELLER and R. ELIASSEN: Assessment of health physics manpower needs . . 1
F. A. FRY: Long-term retention of americium-241 following accidental inhalation . . 13
A. SAAS and A. GRAUBY: An approach to investigations of the behaviour of iodine-129 in the atmosphere–soil–plant system 21
J. P. KELLEY, E. D. TROUT and V. L. LARSON: Leakage radiation from a diagnostic tube housing when operated at less than the maximum rated kilovoltage 27
R. RUGH: Are mouse fetuses which survive microwave radiation permanently affected thereby? 33
A. KITAHARA, M. SAITOH and S. HARASAWA: Analysis of the thermoluminescence response of LiF powder to thermal neutron and gamma ray exposures 41
J. E. WATSON, JR: Influence of chromium on the thermoluminescence and phosphorescence of ruby 47

Notes

H. A. VANDERPLOEG and R. S. BOOTH: Interpretation of biological-rate coefficients derived from radionuclide content, radionuclide concentration and specific activity experiments 57
J. NOVOTNY and J. AL MUDAIRES: Genetically significant dose from use of radiopharmaceuticals in Kuwait 59
H. M. BUTLER, C. B. FULMER and K. M. WALLACE: Neutron shielding of cyclotron targets 62
R. C. CHRISTENSEN and K. L. MILLER: Additional fail-safe interlock recommended for Gammacell 220 irradiators 66
G. N. CATRAVAS: Styrofoam cages for rats used in microwave research: coating with quinine 68
J. L. BEACH and K. BECKER: High-resolution NIAR of fissile elements in bone . . 69
R. D. LLOYD: Gamma-ray emitters in concrete 71
H. KOCOL, D. N. MCNELIS and A. A. MOGHISSI: A study of the particulate and gaseous emissions of tritium from neutron generator targets 73
M. IKEYA: Natural radiation dose in Akiyoshi Cavern and on Karst Plateau . . 76
F. H. ATTIX, E. X. RANK, L. S. AUGUST, G. E. MILLER and P. SHAPIRO: A shielding maze at a neutron radiotherapy facility 78

Letters to the Editor

H. J. FULLBRIGHT: Comment on "The determination of ^{125}I and ^{129}I using an intrinsic germanium detector for X-ray spectroscopy" 81
A. G. CRAIG: Alternatives to the linear risk hypothesis 81
Book Reviews 83
News 87
Notices 91
Health Physics Society Prospectus 95
Health Physics Society Affiliate Members 96

NUMBER 2 AUGUST

H. S. Ho: Energy absorption patterns in circular triple-layered tissue cylinders exposed to plane wave sources 97
M. A. R. Molla, J. E. Harrison and K. G. McNeill: Doses to the cauda equina due to thorotrast myelography 109
J. W. Wilson and G. S. Khandelwal: Proton-tissue dose buildup factors 115
J. A. Auxier: Respiratory exposure in buildings due to radon progeny 119
P. H. Gudiksen, K. R. Peterson R. Lange and J. B. Knox: Plume depletion following postulated atmospheric plutonium dioxide releases 127
H. I. Amols and R. A. Peck, Jr.: Microdosimetry in tissue equivalent fluid irradiated by D-T neutrons 135
M. H. Wilkening and D. E. Watkins: Air exchange and ^{222}Rn concentrations in the Carlsbad Caverns 139

Notes
G. C. Christensen, L. Løvby and A. C. Pappas: Strontium-90 in human bone in Norway 1974 147
E. E. Pochin: Problems involved in detecting increased malignancy rates in areas of high natural radiation background 148
B. R. Paliwal and P. R. Almond: Electron attenuation characteristics of LiF . . 151
T. R. Crites: An experimental study of the spectral dependence of an albedo-type neutron dosimeter 154
J. S. Nagpal, G. Ramanathan and P. Gangadharan: Thermal and optical bleaching of radiation effects in silver activated metaphosphate glass—its use in u.v. dosimetry . 157
E. Lilley and R. Howard: Environmental effects on TLD 100 159
R. P. Specht and A. Brodsky: Log-normal distributions of occupational exposure to medical personnel 160
R. G. Lane, D. D. Tolbert, B. R. Paliwal and R. R. Radtke: Radiation incidents with a cobalt-60 teletherapy unit 163
F. Planas-Bohne and H. Olinger: On the influence of Ca-DTPA on the Zn- and Mn-concentrations in various organs of the rat 165
J. F. Malone, L. A. Malone, J. S. Orr, F. C. Gillespie and W. R. Greig: Experimental validation of a simplified method for determining cumulated activity of radionuclides *in vitro*, based on a single measurement 169
R. Plappert and J. W. McKlveen: Tritium survey of pool-type research reactors .
D. E. Hankins: Evaluation of the fast neutron dose equivalent using the thermal neutron response of Lif TL material 170
T. T. Mercer: The effect of particle size on the escape of recoiling RaB atoms from particulate surfaces 173
A. Boccolini, L. De Franceschi, A. Gentili and G. Gremigni: ^{60}Co in air . . 175
S. K. Mehta: and S. Sengupta: Al_2O_3 phosphor for thermoluminescence dosimetry . 176
E. E. Volk and R. D. Partridge: Decontaminating gloved boxes 178
P. Bassi, G. Busuoli and O. Rimondi: U.V. dosimetry by intrinsic TL of CaF_2;Dy 179
R. Gruner and A. Seidel: Retention of ^{241}Am and ^{239}Pu in the rate as influenced by Triton WR 1339. 182

Letters to the Editor
T. F. JOHNS: The energy response of personal dosimeters 185
R. D. LLOYD: ^{237}Pu studies in beagles: applicability to environmental ^{239}Pu problems 186
K. S. PARTHASARATHY: Decay products of ^{222}Rn in the living environment . . . 187
P. S. RUMMERFIELD: Alap 188
C. P. BLACKMAN, JR., H. P. COPELAND and L. B. DEROSE: Evaluation and control of hazards in laser light shows 189
Book Reviews 191
News 193
Notices 199
Health Physics Society Prospectus 207
Health Physics Society Affiliate Members 208

NUMBER 3 SEPTEMBER

Obituary—CHARLES L. DUNHAM 1906–1975 209
Elda E. Anderson Award *presented to* MCDONALD E. WRENN 210
Distinguished Achievement Award *presented to* W. L. RUSSELL 211
Distinguished Achievement Award *presented to* N. C. RASMUSSEN 212
R. E. BIGLER and H. Q. WOODARD: Skeletal distribution of mineralized bone tissue in humans 213
J. E. FURCHNER and G. A. DRAKE: Comparative metabolism of radionuclides in mammals—XI. Retention of ^{113}Sn in the mouse, rat, monkey and dog . . . 219
P. WENGER✠ and M. COSANDEY: Retention and excretion of radium-226 and strontium-90 in two doubly contaminated persons 225
J. M. BROWN: Linearity vs non-linearity of dose response for radiation carcinogenesis . 231
D. A. WAITE: Analysis of an analytical technique for distributing air sampling locations around nuclear facilities 247
M. C. SUBBA RAMU and K. G. VOHRA: Formation of charged particles in condensation aerosol generators used for inhalation studies 251
American Board of Health Physics. Requirements for application for certification by the American Board of Health Physics 257
K. Z. MORGAN: Rolf M. Sievert: the pioneer in the field of radiation protection . . 263
B. LINDELL: Radiation and man. The 1973 Sievert lecture 265
Abstracts of the British Radiological Protection Association 273
Abstracts of the Yugoslav Radiation Protection Association 276
Abstracts of the Belgian Association for Radioprotection 279

Notes
R. D. LLOYD, C.W. MAYS, S. S. MCFARLAND, G. N. TAYLOR and D. R. ATHERTON: A comparison of Ca-DTPA and Zn-DTPA for chelating ^{241}Am in beagles . . . 281
A. R. LAKSHMANAN and K. AYYANGAR: Thermoluminescence response of $CaSO_4$;Dy and $Li_2B_4O_7$: Mn to polonium-210 alpha radiation 284
Letters to the Editor
G. L. MURPHY and L. A. MUSE: Gas chromatography nickel-63 source leak detection . 287
J. C. THOMPSON, JR.: Comments on the paper, "Radiation doses from iodine-129 in the environment," by J. K. Soldat 287

J. K. SOLDAT: Reply to J. C. Thompson, Jr.'s comments on the paper, "Radiation doses from iodine-129 in the environment," by J. K. Soldat 288
V. VOLF: Should Zn-DTPA replace Ca-DTPA for decorporation of radionuclides in man? 290
Book Review 293
News 295
Notices 297
Health Physics Society Prospectus 303
Health Physics Society Affiliate Members 304

NUMBER 4 OCTOBER

G. D. KERR, H. YAMADA and S. MARKS: A survey of radiation doses received by atomic-bomb survivors residing in the U.S. 305
B. A. MUGGENBURG, J. A. MEWHINNEY, D. O. SLAUSON, J. J. MIGLIO, L. RUOFF, S. MERSCH and R. O. MCCLELLAN: The removal of inhaled ^{239}Pu from beagle dogs by bronchopulmonary lavage and chelation therapy 315
R. G. THOMAS, J. E. FURCHNER, J. E. LONDON, G. A. DRAKE, J. S. WILSON and C. R. RICHMOND: Comparative metabolism of radionuclides in mammals—X. Retention of tracer-level cobalt in the mouse, rat, monkey and dog 323
M. UCHIYAMA, S. AKIBA, Y. OHMOMO, G. TANAKA, T. WATABE, T. ISHIHARA and Y. TAKIZAWA: ^{203}Hg-labelled methyl mercury chloride retention in man after inhalation . 335
E. POHL and J. POHL-RÜLING: Determination of environmental or occupational ^{222}Rn in air and water and ^{226}Ra in water with feasible and rapid methods of sampling and measurement. 346
C. LÜCKE-HUHLE: Proliferation-dependent cytotoxicity of diethylenetriaminepenta acetate (DTPS) *in vitro* 349
W. B. BOWMAN II and D. L. S: Procedure optimization and error analysis for several laboratory routines in determining specific activity 355
J. R. HARVEY, A. LAVENDER and I. M. G. THOMPSON: The calibration of a number of neutron sensitive instruments with a novel source emitting neutrons around 0·5 keV . 363

Notes
J.-C. AMIARD: Assimilation, excretion and distribution of cobalt-60 in the rat after daily ingestion of contaminated marine food products 371
T. NIEWIADOMSKI: Pressure deformation and recovery of thermoluminescence in lithium fluoride 373
L. DE FRANCESCHI, A. GENTILI, P. GUIODI and A. TOSO: ^{60}Co in the marine mollusc, *Pinna nobilis* 376
P. KOTRAPPA, D. P. BHANTI and B. RAGHUNATH: Diffusion coefficients for unattached decay products of thoron—dependence on ventilation and relative humidity
P. KOTRPPA and Y. A. MAYYA: Revision of Raghavayya and Jones' data on the radon decay products in mine air 380
K. D. STEIDLEY: A ^{60}Co hot cell accident 382

P. S. IYER: Acute radiation injury caused by fault X-ray fluoroscopy during cardiac procedures 385
J. W. LUETZELSCHWAB: A field sampling unit that uses an ion-exchange resin to concentrate radioactive ions in river water 387
A. J. GODDARD, J. R. A. LAKEY and A. D. ROWE: The selection of shield design objectives 389
J. R. TRABALKA and L. D. EYMAN: Distribution of plutonium-237 in a littoral feshwater microcosm 391
D. R. SINGH and S. R. NILEKANI: Measurement of polonium activity in Indian tobacco . 394
J. W. POSTON: Why should quantities and units be practical? (Hans Christian Andersen please forgive me) 395

NUMBER 5 NOVEMBER

A. L. MULLEN, E. W. BRETTHAUER and R. E. STANLEY: Absorption, distribution and milk secretion of radionuclides by the dairy cow—V. Radiotungsten 417
W. V. LIPTON and A. S. GOLDIN: Some factors influencing the uptake of plutonium-239 by pea plants 425
T. FAGERSTRÖM and B. ÅSELL: Caged fish for estimating concentrations of trace substances in natural waters 431
I. ANZAI, K. UEDA and M. TOGO: Cesium-137 body burden in Japanese from 1967 to 1975 441
W. B. BOWMAN II and D. L. SWINDLE: Determination of the Ci content of packaged radioactive waste using measured dose rates 445

Notes
L. V. E. CALDAS and M. S. MAYHUGH: Photo-TL in $CaSO_4$:Dy—high exposure dosimetry 451
J. L. BEACH and C.-Y. HUANG: Mixed field dosimetry with $CaSO_4$(Tm) and $CaSO_4$(Tm):Li 452
R. J. COUNTESS: ^{222}Rn flux measurement with a charcoal canister 455
M. MONEY and B. HEATON: The effect of humidity on the detection of radon . . 456
L. A. MUSE and V. RAO: A survey of liquid scintillation solutions for use in urinalysis . 457
K. D. STEIDLEY: Health physics considerations in the use of a roentgen densitometer . 459
E. L. MCGUIRE: Shielding for multiple sources of radiation 462
P. D. COBB and B. E. BJÄRNGARD: Use factors for medical linear accelerators . . 463
D. W. COOKE, M. S. JAHAN and C. ALEXANDER, JR.: Scintillation activity in an unirradiated single crystal of 3-hydroxyxanthine 465
Book Reviews 469
Abstracts of the Japan Health Physics Society 475

VOLUME 6 DECEMBER

R. L. KATHREN: Projected numbers of health physicists, 1975–2000 489
W. B. BOWMAN II, D. L. SWINDLE and D. L. HENDERSON: Radiochemical determination of ^{89}Sr and ^{90}Sr: a comparison of methods based on error analysis 495
W. G. BUCKMAN and T. K. PAYNE: Photostimulated thermoluminescence of lithium fluoride as an ultraviolet radiation dosimeter 501
D. Y. HSIA and T. K. CHEN: Predicted and measured exposures from ^{41}Ar released to the atmosphere by a heavy water research reactor 505
P. S. WENG and C. L. WANG: An investigation of occupational exposure on Taiwan (1973–1975) 513

Notes
G. N. STRADLING, D. S. POPPLEWELL and G. L. HAM: The chemical form of americium and curium in urine 517
N. TAKEUCHI, K. INABE, J. YAMASHITA and S. NAKAMURA: Thermoluminescence of MgO single crystals for u.v. dosimetry 519
L. DAVIES, J. STRAW, R. S. DIXON, A. BENEDETTO and N. L. SASS: Biological half-life of a ^{95m}technetium labeled bone imaging agent 521
P. C. HSU and P. S. WENG: Radiation exposure during air and ground transportation 522

Letters to the Editor
L. A. DEWERD: Changes in the method of references 525
L. A. DEWERD: Handling technique for thermoluminescent dosimeters 525
R. D. LLYD and J. RUNDO: "Half-life" terminology for ^{137}Cs in humans 527
Abstracts of the Twenty-first Annual Meeting of the Health Physics Society . . 529
